MISSION STATEMENT

(S/ORCON) To establish a program using psychoenergics for intelligence applications. Specifically, utilizing that field of psychoenergics referred to as REMOTE VIEWING. The program encompasses the following:

- Establishing a training program in REMOTE VIEWING utilizing selected INSCOM personnel.
- Establishing procedures for intelligence collection techniques utilizing REMOTE VIEWING.
- Establishing a mechanism for responding to intelligence collection requirements (tasking) using REMOTE VIEWING.

TARGET CORRELATION CHART (TCC)*

ASSIGNED VALUE	DESCRIPTION	RATING
1	Absolutely no target correlation.	None (0%)
2	Drawings, narrative, and feedback reaction have minimal target correlation.	Low (15%)
3	Increased target correlation, identity of target could not be determined.	Low-Moderate (30%)
4	Many target correlation factors readily recognizable. Target identity possibilities narrowed.	Moderate (50%)
5**	RV data shows unmistakable correlation to the target. Target possibilities can now be typified.	Moderate-Hig (70%)
6	Little or no extraneous RV data present. Target identity can be readily matched.	High (80%)
7	Correct naming of the target.	Direct Hit (100%)

*Target Correlation Chart (TCC) was established not to prove or disprove Remote Viewing (RV), rather, it was designed to measure RV learning trends and to provide Project Management personnel a readily available management tool.

**Current state-of-the-art indicates this level of expertise is the norm for an experienced Remote Viewer.
